**Software Development Intern, Hashbianry LLP** Apr 2020 - Jul 2020  
• Worked on Pricinger, a **browser extension** that helps you dodge the **dynamic pricing** strategies of online shops.

## PROJECTS

**KZILLA.XYZ**, A simple, blazing fast URL Shrinker 🌐  
A URL Shrinker built using SvelteJS, NodeJS, Express, and MongoDB. Uses google analytics API to fetch analytics of links. Features: Enable/Disable links, My links using cookies.

**Jack**, A bot of all trades 🌐  
Jack, a discord bot that can generate certificates for people who attend events to maintaining a log of activities on the server! Build on DiscordJS, NodeJS. Also has webhooks build with Express.

**Recruitments**, All hiring process at a place!  
Built Recruitments to wow people! A state-of-the-art platform where students can apply for a seat in SRMKZILLA. I was working on the backend part of this project on NodeJS

**MOZOFEST'21 Portal**, March Soon!  
On a single click, there's so much happening at the back. Hooked with Jack through webhooks to give users an amazing online tech fest. Register on the web, continue your journey on Discord.

**Clinilink**, *Simplify curing by connecting*

What if we merge the superpower of our excellent medical staff and their community. This is exactly what we are aiming for. Inspired by stack overflow. Built on **MERN stack**

## COLLEGE ORGANIZATIONS
